

Pupils studying AS and A level Mathematics or Further Mathematics will be required to purchase their own textbooks and calculators.

The new specification requires that calculators can compute summary statistics and access probabilities from standard statistical distributions, as well as evaluate iterative functions; this will likely mean a new calculator for most pupils. Guidance on this will be provided in September.

The Mathematics department will be selling these books and calculators at a reduced rate in September. However, should you wish to purchase these now, links are provided below:

AS books (2 books: Pure and Applied)
